The City of Phoenix

To Whom It May Concern:

Attached for your information is a list of manholes the City of Mesa has rehabilitated over the last ten years. The list provides the manhole numbers, their locations, the year of rehab and the product used. The majority of these manholes were five-foot in diameter precast manholes. The liner type SWS indicates the product used was Sewer Shield applied by Joseph's Painting.

All manholes rehabbed with Sewer Shield were located in sewer lines with documented high concentration of hydrogen sulfide. In all installations Sewer Shield has performed satisfactorily. There have been no failures of the product within its stated warranty period, and the product continues to perform satisfactorily well beyond the warranty period.

If you require any additional information, please contact me at (480) 644-4756.

Sincerely,

Stephen M. Hook
Wastewater Collection Supervisor
